

EPIC Pandemic Response and Resiliency Award Application - Supervisor Form

The EPIC Pandemic Response and Resiliency Award (PRRA) celebrates graduate students that showed great adaptability, perseverance, and initiative in taking on more during their graduate training than otherwise would have been required. The awardees will have demonstrated significant contributions to outbreak, pandemic, or community-based research, and/or community engagement, and demonstrated qualities that will position them to be leaders in confronting future pandemics. These competitive awards support excellent students supervised by faculty from across EPIC’s partner research institutes (the Hospital for Sick Children, Lunenfeld-Tanenbaum Research Institute, Sunnybrook Research Institute, Unity Health Toronto, University Health Network and/or University of Toronto). Applicants for these merit-based awards will be evaluated using the submitted application package.

EPIC is strongly committed to diversity within its community and especially welcomes applications from racialized persons/persons of colour, women, Indigenous/Aboriginal People of North America, persons with disabilities, LGBTQ2S+ persons, and others who may contribute to the further diversification of ideas.

An application for the EPIC PRRA competition will **not be considered finalized** until a completed supervisor form (and co-supervisor form, if applicable) is received. Please note supervisor and co-supervisor are required to complete and submit a single supervisor form. A link to the demographic survey will be provided to the supervisor and co-supervisor(s) upon receipt of their signed Supervisor Form.

Once complete, please submit this form to epic@utoronto.ca. The form should be submitted as a PDF document using the following naming convention:

PRRA_[Last name][First name][Student number]_[supervisor or co-supervisor last name]_form.

Deadline for award applications is **4 May 2024 at 11:59 pm ET**

If you experience any issues with this form, please contact epic@utoronto.ca

Supervisor details

First Name

Last Name

Email

Primary Institution Affiliation

UofT Faculty

UofT Department

Hospital Institute (if applicable)

Student First Name

Student Last Name

Applicant potential (maximum 250 words):

Comment on the applicant's leadership, adaptability, and contributions to science and/or the public understanding of science in response to an infectious disease outbreak, epidemic or pandemic. This can include research output, fostering collaborative efforts within the scientific community and building public and/or community engagement. Specifically, provide insight on whether this was outside the scope of their intended graduate training and how the applicant balanced these additional challenges in the context of their graduate program.
